

Nome Técnico: Sistema Introdutor de Cateter.

Nome Comercial: Bainha de Aspiração Urovac.

Registro ANVISA nº: 80691569005

Classe de risco: II

FABRICANTE:

BIOSAT PRODUTOS MÉDICOS LTDA.

CNPJ: 11.690.313/0001-35

Rua Santa Bárbara, nº 48. Lote 1. Quadra AL. Pavimento Superior. Bairro San José II. CEP: 06742-128 - Vargem Grande Paulista, SP.

Fone: 55(11) 4159-2833 - 55(11) 2369-0069 - SAC: sac@biosat.com.br - www.biosat.com.br

Responsável Técnico: Eng. Milton Wilscenski de Souza – CRQ 4ª – 04363806.

ACESSÓRIOS

Não aplícável

FORMAS DE APRESENTAÇÃO COMERCIAL DO PRODUTO

O dispositivo é embalado primariamente em embalagem polimérica estéril (Tyvek ou Grau cirúrgico). A embalagem secundária para transporte é em papelão. Os componentes são fornecidos em embalagem unitária, contendo:

01 bainha externa

01 dilatador (e um copo coletor quando aplicável).

ESPECIFICAÇÕES DO DISPOSITIVOS MÉDICO

A bainha de aspiração Urovac é indicada para utilização em procedimentos nos quais sejam necessários a dilatação ureteral e o acesso ureteral permanente criando um canal de trabalho minimamente invasivo. E por meio da pressão negativa sugar e remover fragmentos de cálculos durante procedimentos de acesso ureteral. O tempo de permanência do produto em contato com o paciente deve ser de acordo com o procedimento cirúrgico indicado pelo profissional médico.

PRINCÍPIO DE FUNCIONAMENTO/MECANISMO DE AÇÃO

A bainha de aspiração Urovac consiste de uma bainha externa e um dilatador afunilado interno, destinado a estabelecer um canal para a passagem de endoscópios e outros dispositivos urológicos de uso cirúrgico.

A superfície externa do produto é revestida de cobertura hidrofílica para criar uma superfície de baixo atrito, facilitando o processo de inserção.

O mecanismo de travamento da bainha no dilatador permite avanço simultâneo do conjunto.

MODO DE USO DO PRODUTO

Antes do uso, separe o dilatador e a bainha e coloque-os em um recipiente com água estéril ou solução salina estéril para ativar o revestimento hidrofílico.

- Insira um fio de guia (não fornecido) utilizando o procedimento padrão na localização desejada do trato urinário
- Insira o conjunto bainha/dilatador e prenda-os.
- Avance o conjunto do dilatador/bainha sobre o fio de guia para o local desejado.
- Confirme se o conjunto do dilatador/bainha está adequadamente colocado por meio de fluoroscopia.
- Uma vez posicionado o conjunto, agarre e aperte as abas de manuseio do clipe do dilatador para liberar
 o dilatador do funil da bainha e retire-o cuidadosamente enquanto mantém a posição da bainha.
- Não avance a bainha sem o dilatador no lugar.
- A bainha pode ser presa externamente por suturas por meio dos orifícios localizados em seu funil.
- Coloque a tampa de borracha na extremidade reta proximal e conecte o tubo da bainha ao frasco de coleta.
- Conecte o tubo de aspiração do aspirador ao frasco de coleta.
- Introduza a instrumentação desejada através da bainha conforme necessário.
- Quando o procedimento for finalizado, retire cuidadosamente a bainha e o fio guia.
- Aspirador cirúrgico com aspiração negativa contínua a uma pressão de 150-200 mm Hg, bomba de irrigação para uma irrigação pressurizada contínua de 50-100 cm³ por minuto, e endoscópios pelo menos 2,5 Fr, menores e 7cm mais longos que a bainha de aspiração.

Compatibilidade: Aspirador cirúrgico com aspiração negativa contínua a uma pressão de 150-200 mm Hg, bomba de irrigação para uma irrigação pressurizada contínua de 50-100 cm³ por minuto, e endoscópios pelo menos 2,5 Fr, menores e 7 cm mais longos que a bainha de aspiração.

PUBLICO DESTINADO A UTILIZAR O MATERIAL

Profissional da saúde – Médico cirurgião devidamente habilitado.

COMPOSIÇÃO

- Bainha (camisa introdutora): núcleo de aço inoxidável 304, com revestimento de teflon (PTFE).
- Conector da bainha e dilatador: Acrilonitrila Butadieno Estireno (ABS) e polietileno de alta densidade (PEAD).
- Coletor (frasco) e tubo: Polipropileno (acessório opcional).

VALIDADE

36 meses.

MÉTODO DE ESTERILIZAÇÃO

Óxido de etileno.

O fabricante recomenda uso único.

CONDIÇÕES DE ARMAZENAMENTO

Armazenamento: Manter em local protegido de chuva e sol direto, e em sua embalagem original. Faixa de temperatura ambiente de armazenamento: 0ºC a 40ºC;

Faixa de umidade relativa de armazenamento: 30% a 95% (não condensante).

CONDIÇÕES DE TRANSPORTE

Transporte: Não deixar cair no chão ou movê-lo em superfícies esburacadas. Ao transportar proteja a embalagem da chuva direta. Respeitar o empilhamento máximo informado na parte externa da embalagem.

Faixa de temperatura ambiente de transporte: 0°C a 40°C;

Faixa de umidade relativa de transporte: 30% a 95% (não condensante).

CONDIÇÕES DE MANIPULAÇÃO

Faixa de temperatura ambiente de transporte: 0°C a 40°C;

Faixa de umidade relativa de transporte: 30% a 95% (não condensante).

ADVERTÊNCIAS

O dispositivo é indicado para uso exclusivo por médicos urologistas que tenham recebido treinamento suficiente em técnicas endoscópicas clínicas.

Antes de utilizar o dispositivo verifique a compatibilidade de seus diâmetros com o fio guia, endoscópios e instrumentos relacionados.

Use endoscópios pelo menos 2,5 Fr, menores e 7 cm mais longos que a bainha de aspiração. Certifique-se que de que a ponte da bainha de aspiração esteja a 5-10 mm de distância da pedra. Defina a aspiração negativa contínua a uma pressão de 150-200 mm Hg.

Defina a irrigação pressurizada contínua para 50-100 cm³ por minuto. Ligue a sucção antes da irrigação pressurizada. Não insira o dispositivo a não ser que você possua um campo de visão endoscópica nítido.

Assegure-se de que o dilatador está bem fixado ao funil da bainha, garantindo que o conjunto dilata- dor/bainha possa ser posicionado como uma peça única, o que permite o posicionamento com apenas uma mão.

A aplicação de força excessiva pode danificar o dispositivo.

Evite o contato com objetos afiados, visto que o dispositivo pode ser facilmente lascado, aumentando o potencial de quebra.

Não avance ou puxe o conjunto dilatador/bainha se houver muita resistência ao movimento.

A manipulação incorreta pode comprometer seriamente a bainha. Uma dobradura ou curvatura aguda durante a colocação pode resultar numa subsequente ruptura.

Em caso de danos à embalagem original do produto, ele deve ser imediatamente descartado tendo em vista que a esterilização de fábrica pode ter sido afetada.

PRECAUÇÕES

RECEBIMENTO Durante o recebimento, inspecione os componentes para verificar possíveis danos durante o transporte.

• As alegações de possíveis danos somente serão aceitas se tiverem sido relatadas ao entregador ou diretamente ao remetente. • Se o produto for devolvido, é obrigatório o uso da embalagem original. Não deixe o produto exposto às condições atmosféricas (chuva, sol, etc.). VERIFICAÇÃO DA DATA DE VALIDADE O dispositivo não pode ser utilizado depois da data de validade impressa em sua embalagem. VERIFICAÇÃO DA INTEGRIDADE DA EMBALAGEM Não pode ser utilizado o dispositivo cuja embalagem não assegurar a preservação da esterilidade – embalagem perfurada, rasgada, descolada, etc.

CONTRAINDICAÇÕES

O dispositivo é contraindicado para uso em pacientes que não tolerem procedimentos urológicos retrógrados.

EFEITOS ADVERSOS

O uso deste dispositivo deve ser baseado em considerações de risco-benefício e das condições particulares de cada paciente. Todas as informações do procedimento a ser realizado devem ser do conhecimento do paciente.

Danos ou irregularidades podem comprometer a segurança do paciente ou usuário, como, por exemplo, risco de controle de infecções, irritação de tecidos, etc.

Os demais efeitos adversos incluem os riscos associados ao grau de intolerância ao procedimento cirúrgico ou à medicação usada durante o procedimento.
